

# NEUROSCIENCE AND EDUCATION

2010 Meeting of the EARLI SIG 22

**Educational Neuroscience: Is it a field?**  
**2010 Meeting of the EARLI SIG 22**  
June 3-5, 2010  
ETH Zurich, Switzerland

## Call for Papers

The central theme of the meeting will focus on theoretical and conceptual issues. The field of educational neuroscience emerged for the first time more than 10 years ago. With the advent of centres for educational neuroscience and mind, brain and education, it is of particular importance to ask: Where are we now? Where is the field going to? Which questions have been asked and answered (un)successfully? Which questions need to be addressed in future work?

### Keynote speakers:

Brian Butterworth	University College London, UK
Donna Coch	Dartmouth College, USA
Usha Goswami	University of Cambridge, UK
Kurt Fischer	Harvard University, USA
Lutz Jäncke	University of Zurich, Switzerland
Elsbeth Stern	ETH Zurich, Switzerland

### Poster sessions:

In addition to the keynote lectures, there will be an interactive poster session. We invite participants to submit a poster proposal containing empirical research at the intersection of neuroscience and education. Authors of accepted posters will be explicitly asked to discuss their findings in one-on-one or in small groups during the poster session and to answer attendees' questions. It will give the authors an excellent venue for advertising and presenting their work.

### Important dates:

Deadline for poster proposal submission:	15 January 2010
Proposals confirmed:	15 February 2010
Deadline for registration:	15 April 2010

For further information and registration: [www.SIG-NeuroEdu2010.ethz.ch](http://www.SIG-NeuroEdu2010.ethz.ch)

### Organizing committee:

Roland H. Grabner	ETH Zurich, Switzerland
Bert De Smedt	KU Leuven, Belgium
Daniel Ansari	University of Western Ontario, Canada
